### Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

⚠        `scale]` attribute is less than 5.                                                    ⌄

These items highlight common accessibility best practices.

## CONTRAST

⚠      Background and foreground colors do not have a sufficient contrast ratio.        ⌄

These are opportunities to improve the legibility of your content.
